

History and Past Chairpersons

The original Forum, the Junior Radiologists Forum (JRF) was created during the ECR 1991 in Vienna in order to improve the fields of training, career development and research for junior radiologists, as well as to promote exchange programmes and the creation of national junior radiologists' organisations. JRF held its first assembly in 1993, during which the first executive board was elected.

In an effort to revitalise JRF and to increase the cooperation within European radiology, the JRF charter officially changed in 2006 into the Radiology Trainees Forum (RTF).
