Start your future with the ESR Research Seed Grant

APPLY NOW
Following the highly successful Seed Grant Initiative in 2020, the European Society of Radiology (ESR), in cooperation with the European Institute for Biomedical Imaging Research (EIBIR), invites applications for the ESR Research Seed Grants 2022.

The purpose of this programme is to stimulate and provide funding for innovative projects and pilot studies that will subsequently lead to larger studies and further funding applications.

Project proposals must align with the ESR Research Seed Grants thematic areas. The funding priority 2022 is for research in Artificial Intelligence (including quantitative imaging and radiomics) and Interventional oncologic radiology.

Proposals at all stages of development are welcome. Topics within the fields of AI and Interventional oncologic radiology include, but are not limited to, the following:

**Artificial Intelligence**
- Data annotation
- Algorithm development
- Algorithm training
- Algorithm testing
- Algorithm validation

**Interventional oncologic radiology**
- Methods
- Data acquisition
- Image guidance
- Software and device testing
- Outcome analysis

**Eligibility Criteria**
The Call for Proposals is open to researchers of all ages working in a radiology department in a European country. Applicants must be members of the European Society of Radiology (Become a member now!).

The project proposed should not have previously received funding from another grant or form part of another ongoing project application.

**Funding**
Applicants may request seed grants amounting to €5,000-8,000 for a period not to exceed 12 months. Up to 10 seed grants will be awarded in 2022. Recipients will be announced at ECR 2022.

The ESR Research Seed Grant 2022 initiative is kindly supported by an unrestricted, non-exclusive grant from GE Healthcare.

**Key Dates**
Application Deadline: January 15, 2022 (11:59 am CET)
Funding Period: April 1, 2022-March 31, 2023
